

Amendments to the Abstract:

Please add the following new Abstract of the Disclosure as a separate page after the claims:

ABSTRACT OF THE DISCLOSURE

A detachable wheel cover for a trolley, pushchair or the like has a substantially cylindrical part which is adapted to fit around the periphery of a wheel, a first side adapted to cover one side of the wheel and a second side adapted to cover the other side of the wheel. The edges of the sides are secured to the edges of the substantially cylindrical part by stitching and/or adhesive. An opening which is closable by a flap is provided in the side so that the wheel can be inserted into the cover. Once the wheel has been inserted, the flap can be folded to close the opening and the flap can be held in position by a releasable fastener such as "Velcro" (Registered Trade Mark). An axle on which the wheel is mounted extends through a small central aperture in a central region of the side of the cover.
